Gobbill™ is an innovative fraud detection and payment automation platform. It forensically extracts data from invoices, checks for fraud and executes payments. As a SaaS model FinTech, it protects businesses from payment scams and fraud which has exploded by 7x in the last 3 years to £1.2B in 2019 according to UK Finance. Gobbill has spent 3 years of R&D on its “Know Your Biller™” technology to detect invoice fraud and built an end-to-end payment automation platform giving users maximum control over payments with minimal effort.

The company has multiple revenue streams including monthly subscriptions, enterprise agreements

and clip the ticket on transactions. Its go to market approach will leverage its existing and new partnerships with enterprises.
